Request for an independent medical opinion

FICTIONAL EXAMPLE. These invented records were processed through the Raven Nexus draft engine. No real veteran, clinician, or medical opinion is represented. Do not submit this example as evidence.

Dear **[VETERAN: Add your practitioner's name]**,

Would you review the medical evidence concerning Lumbar spine condition for my VA disability claim? The question is: Whether Lumbar spine condition is related to an injury, event, or exposure during military service.

I used Raven Nexus to organize an AI-assisted working draft and an evidence appendix. These materials are preparation aids, not a medical opinion or a request for a signature without independent review. Please correct or remove anything you do not support, revise or replace the draft, and reach your own conclusion.

This draft has unresolved evidence or review gaps. Please identify any additional information needed before offering an opinion. Please review the underlying records rather than relying on selected excerpts alone. The appendix identifies source material and research; original records are not automatically attached.

If you can assist, please let me know which records you need, whether an appointment is necessary, any fees, and your preferred process for returning your opinion. If you cannot assist or cannot reach a supported conclusion, please let me know. I am not asking you to guarantee a VA outcome.

Thank you for considering my request.
